I was certified in;

-html and CSS

-c#

-js and its

-react

-angular

COURSERA

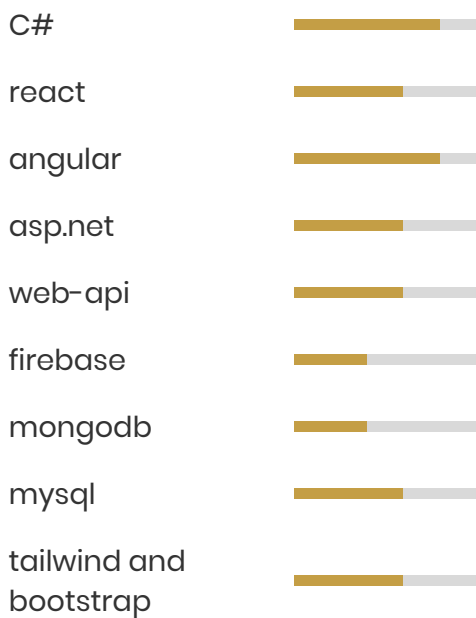

I am a proficient developer with expertise in asp.net6, web-api.net, and entity framework. My experience includes creating successful demo projects using these skills.

- Completed courses in asp.net6, web-api.net, and other tools such as entity framework and MySQL.

- Utilized these skills to develop successful demo projects.

- Adept in developing web-based applications using asp.net6 and web-api.net.

- Proficient in database management and querying using entity framework and MySQL.

LANGUAGE

PROJECT

DRIVELINK WEB APP

vanilla js (2024/01 - 2024/06)

- Proficient in vanilla JavaScript for UI development and data manipulation.
- Skilled in building web transportation apps for enhanced user experience.
- Strong experience in GitHub for version control and collaboration.
- Developed a personal transportation app using vanilla JS for reference and portfolio.

As a web developer, I specialize in building user-friendly transportation apps using vanilla JavaScript. With expertise in GitHub, I have successfully managed version control and collaborated with teams on projects. My personal transportation app, available on github.com/superkingsely, serves as a reference for my skills and capabilities.

HOUSING PROJECT

c# \$ Angular ()

In my journey to become a full stack developer, I completed a housing project using Angular and web-api.

- Utilized Angular for an efficient and dynamic user interface design
- Developed a functional backend using web-api for seamless integration
- Demonstrated my skills through a full stack housing project
- Source code for the project can be viewed on my GitHub page: <https://github.com/superkingsely/HSPA>

STOCKS WEB-API

c# ()

I have successfully created a C# project called "Stocks Web-API", showcasing my skills in controller CRUD operations, Entity Framework, IdentityDbContext, data annotation, repositories, models, DTOs, entity relationship and cors.
